

# solvoprint wallpaper stucco NW

## Technical Information

### ➤ General Information

- ca. 350 g/m<sup>2</sup> heavy PVC coated non-woven material
- Inkjet printable wallpaper with textured surface (rough, similar stucco)
- opaque appearance
- flame retardency treatment / **B1 test certificate**

### ➤ Areas of Application

- suitable for solvent based-, latex- and UV-curable ink systems
- the usage of eco-solvent and UV-curable inks may lead to a limited scratch resistance
- very hard-wearing, printable wallpaper for creative wall design
- suitable for indoor application
- application without laminating is possible
- more durability potential with liquid lamination

### ➤ Processing & Handling

- for adhesion we recommend P.V.A.C. dispersion glue (e.g. Ovalit T from Henkel)
- processing is possible with useful tools
- no special knowledge necessary
- for further information please refer to the general application tips on our homepage [www.neschen.de](http://www.neschen.de)

### ➤ Advantages / Special Features

- bright colours with high brilliance and very good print quality due to special PVC coating
- good scratch resistance after complete drying (depending on inks used)
- quick drying with normal ink load
- non-woven construction allows the complete removable from substrate
- ideal for creating customised interior design
